### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Levin et al discloses a CDMA system wherein demodulation front end comprises an on-time Walsh chip buffer and an early/late Walsh chip buffer. The time tracking block coupled to the early/late Walsh chip buffer to provide an advance or retard indication to one the plurality of the demodulation front ends.

Ziv et al discloses an integrated search processor for a spread spectrum communication system which comprises an antenna sample buffer having odd Walsh chip buffer and an even Walsh chip buffer.

The prior art of record, taken individually or collectively, fails to disclose "a method of time tracking in a vector correlator, comprising the steps of (a) providing a vector correlator based system having a triple data input buffer having three parts wherein two of the three parts are available for processing by a correlator datapath while the remaining part is being written into by incoming chips, and further wherein one of the two parts of the triple data input buffer available for processing contains a plurality of early sets of chips while the remaining part contains a plurality of temporally late sets of chips; (b) receiving chip samples into the triple data input buffer; and (c) despreading a plurality of triple data input buffer chips selected from the two buffers available for processing by the correlator datapath in a single correlation processing cycle."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
